

Preliminary Environmental Epidemiology Surveillance Summary

Utah, JANUARY 2009

Surveillance Activity Report

This website reports preliminary environmental epidemiology surveillance activity for the State of Utah. These numbers are subject to change upon completion of ongoing investigations or due to late reporting. Events may be confirmed, dismissed, or classified differently when the investigations are completed. Events reported late and events with changed status are reflected in the year-to-date column but not in the month column. Previously posted reports are not updated for events reported late or events that have changed status. The year-to-date column may be different than the sum of the reported monthly figures. The year-to-date column is accurate at the time the report is posted.

	January 2009	YEAR TO DATE
Number of blood tests for children 0-5 years age	395	395
Number of elevated blood tests for children 0-5 years of age	5	5
